1. Identify and explain the part of your program that is the input section.

   Lines 2-11 are the input section. This part asks for the users goal, and daily water intake in fluid ounces.

2. Identify and explain the part of the program that is the data processing section.

   Lines 14-16 are the data processing section. This part calculates the total and average water intake for the week and rounds it.

3. Identify and explain the part of the program that is the output section.

   Lines 9-26 are the output section. This part uses the calculated totals to show the user's goals and which ones they met.
